Group 102-4
Group Members: Dazong Chen, Tyler Fransler, Chinwei Yang, Titus Bard, Ryan Swanson

Group Meeting (10/1/2019)

Today we discussed, in detail, the layout of the website and the technologies that we would build it with. We are going to build a website with Django and Bootstrap to create a very nice design. Titus is in charge of the design of the homepage and Chinwei is in charge of the website database. Ryan is in charge of website hosting and Simon is in charge of website layout. Below is a picture of our proposed layout.
